

Minecraft Server Checklist - Completed

Date: 2026-04-30

This PDF documents the completed items from the project checklist for the custom Minecraft server.

Project Status

- [x] Project directory was created and initialized as a Git repository.
- [x] GitHub repository was created and the local main branch was pushed.
- [x] GitHub URL is available: <https://github.com/FatihYalcin42/minecraft-server>
- [x] Minecraft server runs locally and on the cloud VM.
- [x] Minecraft client connection to the VM server was successful.

1. Repository

- [x] .gitignore exists and excludes local runtime files.
- [x] docker-compose.yaml exists and defines the mc-server service.
- [x] README.md exists and is written in English.
- [x] All additional files are named and described in the README.md.
- [x] server.jar exists in the repository and is used by the Dockerfile.

2. Dockerfile

- [x] Dockerfile exists.
- [x] A custom image is built from eclipse-temurin:25-jre.
- [x] No prebuilt Minecraft Docker image is used.
- [x] server.jar is copied into the image.
- [x] docker-entrypoint.sh is copied and made executable.
- [x] Port 25565 is exposed inside the container.
- [x] The server starts with Java in nogui mode.
- [x] Java 25 is used because the selected server.jar requires this runtime.

3. docker-compose.yaml

- [x] The mc-server service is defined.
- [x] Build configuration points to the local Dockerfile.
- [x] Container name mc-server is configured.
- [x] Restart policy unless-stopped is configured.
- [x] Port mapping 8888:25565 is configured.
- [x] Environment variables are configurable.
- [x] Persistent volume ./data:/data is configured.
- [x] Container data remains available after a restart.

4. README.md

- [x] Table of Contents is present.
- [x] Repository description is present.
- [x] Quickstart section is present.
- [x] Usage section is present.
- [x] Configuration and environment variables are documented.
- [x] Testing steps are documented.
- [x] Security notes are documented.
- [x] Documentation language is English.

5. Security and Conventions

- [x] .env is not committed.
- [x] No SSH keys are stored in the repository.
- [x] No passwords or tokens are stored in the code.
- [x] No sensitive IP addresses are committed in configuration files.
- [x] Variable names use UPPER_CASE_WITH_UNDERSCORE.
- [x] Variable references use the \${VARIABLE_NAME} notation.
- [x] Non-sensitive default values are configured in docker-compose.yaml.

6. Testing

- [x] docker compose config completed successfully.
- [x] Docker image was built successfully.
- [x] Server was started locally.
- [x] Server was started on the VM.
- [x] Logs show: Done (...)! For help, type "help".
- [x] VM listens on port 8888.
- [x] Port mapping 0.0.0.0:8888->25565/tcp is active.
- [x] Minecraft client connection to 91.98.162.80:8888 was successful.
- [x] Persistence was confirmed by restart and existing data/world files.

7. Submission

- [x] GitHub repository is online.
- [x] Project files are committed.
- [x] Server status and logs can be shown during submission.
- [x] Note: Loom video is not included.
